BUSINESS ANALYSIS REPORT

Apex Lark – Day 05 | Advanced Excel Business Analysis

Project: Superstore Sales & Profit Analysis

Tool Used: Microsoft Excel

1. Project Overview

Performed business analysis on the cleaned Superstore dataset to evaluate sales, profit, customer performance, product categories and regional performance using Excel formulas and reporting techniques.

2. Worksheets Created

- **Sales Data:** Organized transaction details, including Order ID, Customer ID, Product ID, Quantity, Sales and Profit.
- **Customer Data:** Customer details, total sales and customer ranking.
- **Product Data:** Product details, category, calculated unit price, total sales and product ranking.
- **Final Report:** Combined transaction data, lookup results, logical analysis, business metrics and reporting summaries.

3. Excel Skills & Functions Applied

- **Lookup Functions:** XLOOKUP, VLOOKUP, HLOOKUP, INDEX and MATCH.
- **Logical Functions:** IF, IFERROR, AND and OR.
- **Data Analysis Functions:** SUMIF, SUM, AVERAGE, COUNTA, UNIQUE, RANK.EQ, LARGE and MIN.
- **Other Skills:** Removing duplicates, data organization, KPI creation, ranking, conditional formatting and dynamic business reporting.

4. Key Business Metrics

- **Total Sales:** $2,296,919.49
- **Total Profit:** $286,409.08
- **Average Sales:** $229.85
- **Total Orders:** 5,009
- **Total Customers:** 793
- **Profit Margin:** 12.47%

5. Business Insights & Findings

1. Which region generated the highest revenue?
The **West Region** generated the highest revenue.

2. Which customer contributed the highest sales?
Sean Miller was the highest-contributing customer in terms of sales.

3. Which product category was the most profitable?
Office Supplies was identified as the most profitable product category.

4. What business problems were identified?

- Most records contribute low-to-medium levels of sales and profit.
- Profit contribution is comparatively concentrated in the West Region.
- East and Central regions generate comparatively lower profit, indicating scope for improvement.

6. Conclusion

This analysis helped identify key sales trends, customer contributions, profitable product categories and regional performance. Excel lookup, logical and analytical functions were used to convert raw transaction data into meaningful business insights and a structured report.
